

Frequently Asked Questions

1. The application deadline is in September and the fund targets researchers submitting proposals to external sponsors. Does this mean I should first submit a proposal to an external funding agency prior to the September deadline, or would an external proposal under preparation as of the September deadline qualify?

A proposal to an external funding agency under preparation is completely fine subject to this condition - the timing requirement is that the proposal to the external funding agency must be sent such that you will hear from the agency by May, 8 months after the September Bridge-Fund proposal deadline (i.e., the agency's leadtime determines when you need to submit).
