FIRST Algorithmics	FIRST Algorithmics	FIRST	Operational risk events database - a collection of external, public operational risk loss events in the form of risk case studies. Algo FIRST events are targeted at the financial sector and contain over 20 years' worth of events, which have been indexed to 13 keyword hierarchies, including Basel category and business line. Other hierarchies include control factor, event trigger, business unit type, entity type. Algo FIRST cases include detailed descriptions that break down the event to analyze root cause, as well as identifying control breakdowns, lessons learned, management response and aftermath of the event. Events can also include sections with supporting detail that timeline the event, as well as relevant information about the institution that it happened to, or other detail about loss impacts. The bulk of events in FIRST capture quantitative information as well as detailed qualitative analysis. This quantitative information takes the form of loss amounts captured at the time of the event and CPI-adjusted to current day values.
